Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,3 and 4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Turner et al.

Claims 1,3 and 7 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Franke.

Claims 9 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Olsen et al. '523. Olsen's connecting member is capable of being connected to an anchoring member.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Turner et al. The examiner takes official notice that the practice of forming a loop

in a strap or cable as a means for connecting the strap/cable to an object is a conventional practice, and to provide the end of his elongated member with a loop formed therein as a connecting means, would have been obvious to one of ordinary skill in the art at the time the invention was made to in view of the conventional teaching.

Claims 2,9-11,17 and 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carson in view of Turner et al. Carson shows the claimed device with the exception of the ratcheting load binder having an elongated member with a connecting member. Turner shows a ratcheting load binder 60 having an elongated member 62 with a connecting member 66. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Carson to comprise a ratcheting member, elongated member and connecting member, as taught by Turner, in lieu of his means at 50, to enhance the anchoring force of his device. The examiner takes official notice that the practice of forming a loop in a strap or cable as a means for connecting the strap/cable to an object is a conventional practice, and to provide the end of his elongated member with a loop formed therein as a connecting means, would have been obvious to one of ordinary skill in the art at the time the invention was made to in view of the conventional teaching.

Claims 6,8,12-16 and 22 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 3/29/06.
